

Amazon Trees

Sustainable Carbon Credit Investment in Brazil's Reforestation Market

www.amz3s.com

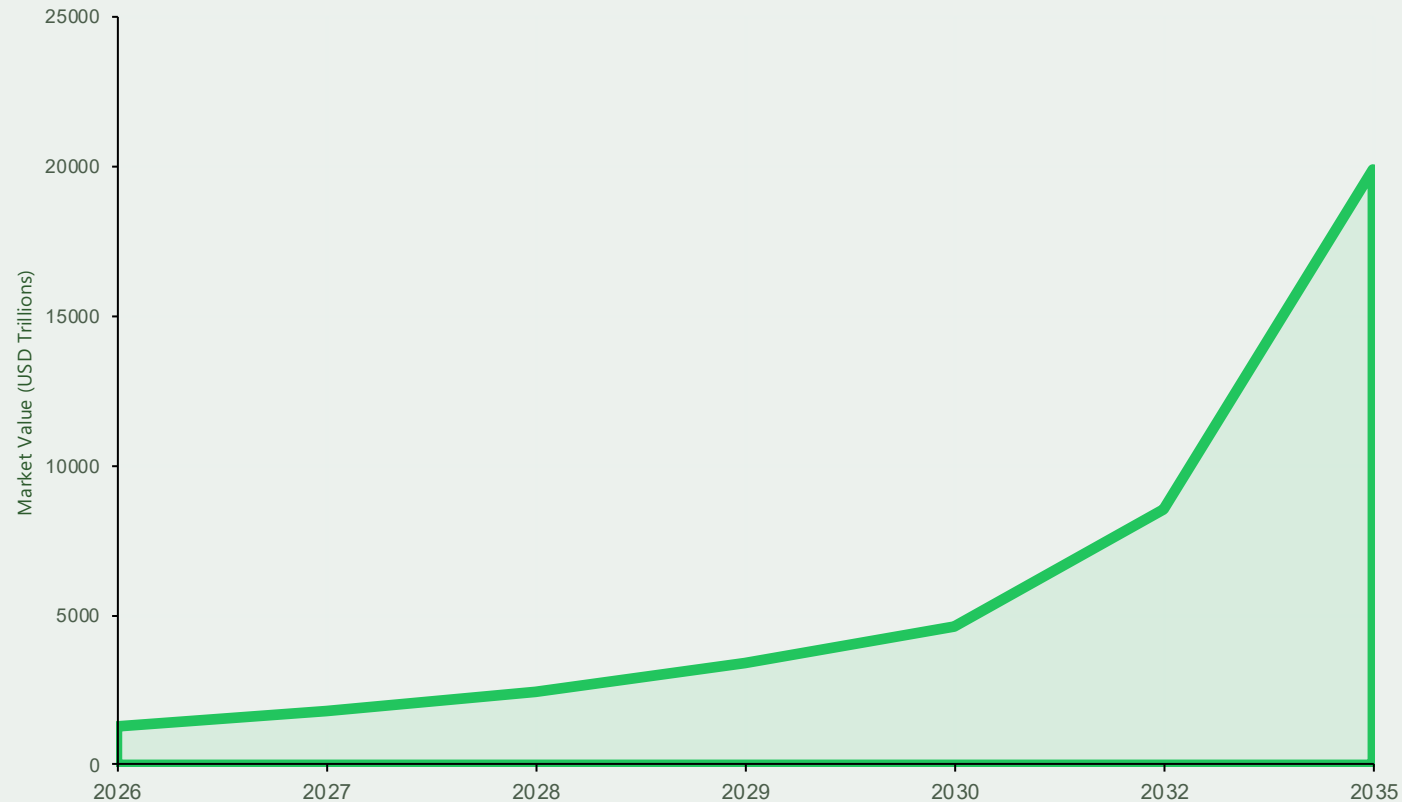

Market Opportunity

Exponential growth in global carbon credit markets with Brazil leading regulatory innovation

Global Carbon Credit Market Growth

Market size trajectory (USD Billions)

● Market Value ● CAGR: 37.68%

2026 MARKET SIZE

\$1.3T

Current market foundation with established voluntary carbon markets and emerging regulatory frameworks.

BRAZIL SBCE SYSTEM

Lei 15.042/2024

Brazil implements regulated carbon market system, creating structured investment opportunities.

FORESTRY SHARE

29%

Forestry projects contribute 29% of global carbon credit issuance with strong returns.

2035 PROJECTION

\$19.9T

Massive market expansion driven by corporate net-zero commitments and regulatory compliance.

Our Business Model

Land Acquisition

Strategic acquisition of **8,000 hectares** over 5 years, targeting degraded pasturelands and forest areas suitable for REDD+ reforestation projects.

REDD+ Development

Implementation of **reforestation projects** with continuous monitoring, biodiversity enhancement, and community engagement following REDD+ standards.

Certification

Compliance with **VCS/Gold Standard** certifications and Brazilian SBCE system ensuring verified carbon credit quality and market acceptance.

Revenue Generation

Multiple revenue streams: carbon credit sales at **R\$ 45-350/tCO₂e**, land appreciation, and ecosystem services monetization.

Competitive Advantages

Regulatory Compliance Advantage

Early compliance with Lei 15.042/2024 SBCE system positions us ahead of competitors in Brazil's evolving carbon market.

Strategic Partnerships

Established relationships with indigenous communities ensure authentic REDD+ project development and community support.

Technology Integration

Integrated digital platform for credit tracking provides transparency and efficiency throughout the certification process.

Local Expertise

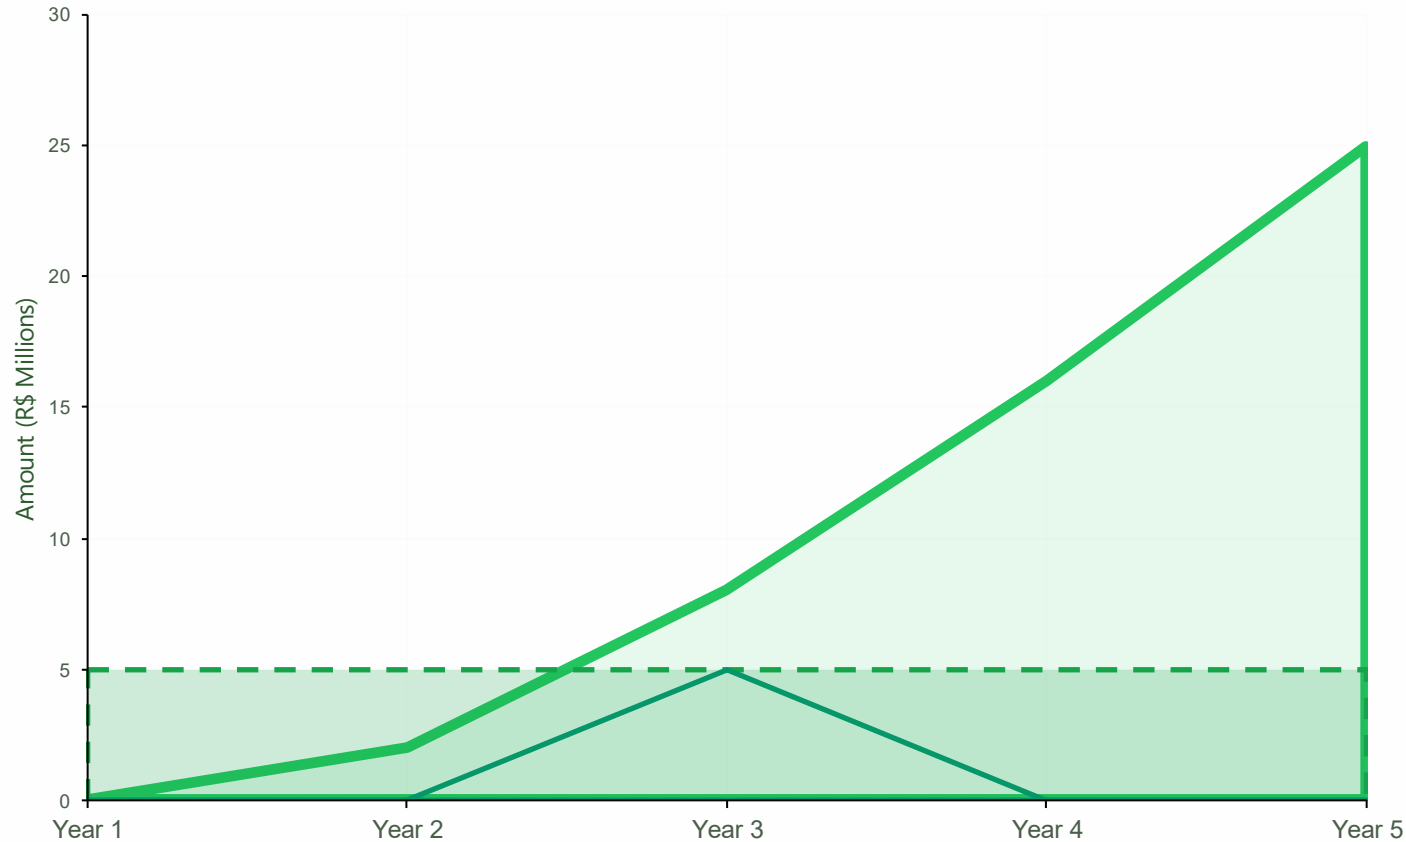

Experienced team in Brazilian environmental law and VCS/Gold Standard certification ensures high-integrity project delivery.

Financial Projections

5-Year Financial Trajectory

Revenue growth from R\$ 5M investment to R\$ 25M total revenue

● Revenue ● Investment ● Break-even

ROI TARGET

400%

Expected return on investment over 5-year period, demonstrating strong financial performance in carbon credit market.

TARGET AREA

8,000 ha

Total hectares under REDD+ project management for forest conservation and carbon credit generation.

TEAM GROWTH

8 → 50

Planned workforce expansion from initial team to full operational capacity supporting project scale.

CREDIT PRICING

R\$ 45-350

Carbon credit pricing range per tCO₂e, varying by project type and certification standards (VCS/Gold Standard).

Implementation Strategy

Key Strategic Milestones

01 Foundation Phase

Company incorporation, team formation, and initial funding secured to establish operational base.

02 Development Phase

Land identification and acquisition process with REDD+ project initiation in key forest regions.

03 Certification Phase

Credit certification processes, digital platform development, and first carbon credit sales.

04 Scaling Phase

Operations scaling, additional land acquisition, and market expansion across Brazil.

IMPLEMENTATION ROADMAP

- 1 Phase 1: Foundation** Months 1-6
 - Focus:** Company incorporation, team formation, and initial funding.
 - ✓ Establish legal entity and operational structure
- 2 Phase 2: Development** Months 7-18
 - Focus:** Land identification, acquisition, and REDD+ project initiation.
 - ✓ Secure target forest areas and begin projects
- 3 Phase 3: Certification** Months 19-36
 - Focus:** Credit certification, platform development, and first sales.
 - ✓ Launch digital platform and revenue generation
- 4 Phase 4: Scaling** Years 4-5
 - Focus:** Operations scaling, additional land acquisition, and market expansion.
 - ✓ Achieve full operational capacity and growth

Environmental Impact

8,000 hectares

Forest conservation and restoration across target regions

2.4M tCO₂e

Estimated carbon sequestration over 20 years

Amazon & Cerrado

Critical habitat preservation in key biomes

200+ local jobs

Employment and indigenous partnership programs

— INVESTMENT OPPORTUNITY —

"Join us in transforming **Brazil's carbon market** while generating sustainable returns and meaningful environmental impact."

INVESTMENT TERMS

R\$ 5M initial funding for 20% equity stake in Amazon Trees' reforestation and carbon credit development platform.

MARKET TIMING

Brazil's SBCE system creating regulated demand for verified carbon credits with strong government backing.

GROWTH POTENTIAL

37.68% CAGR in global carbon markets with significant environmental and social impact opportunities.
